HORSE COMPETITION

COMPLEMENTARY SPORT HORSE FEED

This horse feed can satisfy the energetic requests of a horse involved in high level sport activities. Its particularity is to magnify the quality of premium cereals available on the market by delicate and balanced cooking (flaking) in order to optimize the product digestibility. It can satisfy the most exigent palate since being molassed and aromatized. The integral flaked soybean has the primary role of protein and lipid source. The nutritional balance is reached with the additions of vitamins, salts and trace elements specially formulated for horses.
